## SUMMARY

I am a frontend web developer and communication engineer with over two years of experience in creating user-friendly and responsive websites and applications. I have a strong knowledge of HTML, CSS, JavaScript, React, and Bootstrap, as well as communication protocols, network architectures, and signal processing. I have successfully delivered projects for clients in various industries, such as e-commerce, education, and media. I am passionate about learning new technologies and improving my skills. I am looking for a challenging and rewarding position where I can apply my expertise and contribute to the growth of the company.

## EXPERIENCE

Frontend Web Developer and Communication Engineer

January 2020 - Present

- Developed and maintained frontend web pages and applications using HTML, CSS, JavaScript, React, and Bootstrap.
- Implemented communication features such as chat, video conferencing, and file sharing using WebRTC, WebSocket, and RESTful APIs.
- Collaborated with backend developers, designers, and project managers to ensure the quality and functionality of the products.
- Tested and debugged the code using various tools and frameworks such as Jest, Enzyme, Chrome DevTools, and Postman.
- Researched and evaluated new technologies and trends in web development and communication engineering.

## EDUCATION

Bachelor of Engineering in Communication Engineering

Helwan University

September 2019 - June 2023

- Completed courses in frontend web development and communication system
